

Google Dorking

¿Qué es Google Dork?

Es básicamente una cadena de búsqueda que utiliza una consulta de búsqueda avanzada para encontrar información que no está fácilmente disponible en los sitios web. También se considera una actividad ilegal de piratería de Google, que los piratas informáticos a menudo utilizan con fines como el terrorismo cibernético y el robo cibernético.

Operadores de búsqueda especiales de Google

Antes de comenzar con Google Dorks, debe tener una comprensión básica de algunos operadores de búsqueda especiales de Google y también cómo funciona.

1.intitle:

Esto le pedirá a Google que muestre las páginas que tienen el término en su título html

The screenshot shows a search results page from a search engine. The search query is "intitle:login". Below the search bar are several navigation links: Images, Hotmail, Gmail, My account, Office 365, Download, Email, and Or log in. The main content area displays search results for "Login".

- Wikipedia**
https://en.wikipedia.org/wiki/Login ...
[Login](#)
In computer security, logging in is the process by which an individual gains access to a computer system or program by identifying and authenticating ...

[LOGIN Definition & Usage Examples](#)
a username and password that allows a person to log in to a computer system, network, mobile device, or user account:I've forgotten my login again!
- Instagram**
https://www.instagram.com/accounts/login ...
[Login](#)
Welcome back to Instagram. Sign in to check out what your friends, family & interests have been capturing & sharing around the world.
- Salesforce**
https://login.salesforce.com/ ...
[Login | Salesforce](#)
Salesforce Customer Secure Login Page - Login to your Salesforce Customer Account

2. inurl:

Busca el término especificado en la dirección URL.

Por ejemplo: inurl: register

The screenshot shows a search results page from a search engine. The search query is "inurl: register". The results are as follows:

- FirstMonday.org**
https://firstmonday.org/ojs/index.php/user/register
Register
Register · Email · Username · Password · Repeat password ...
- Register.com**
https://www.register.com
Register Domain Names at Register.com - Business Web ...

- GovInfo (.gov)**
https://www.govinfo.gov/app/collection
Federal Register

3. filetype:

Se ha buscado un determinado tipo de archivo.

Ejemplo: filetype:pdf will search for all the pdf files in the websites.

The screenshot shows a search results page from a search engine. The search query is "filetype:pdf intitle:hacking". The results are as follows:

About 29,500 results (0.23 seconds)

It is an act of intruding/ penetrating into. the system or network to discover threats and vulnerabilities which a hacker may find and. exploit leading to loss of data, money etc.

Hacking 101
17 Nov 2023 — This 1-day course teaches you how to apply basic security principles in your current role and can help you begin a career in cybersecurity.

4. ext:

Funciona de manera similar al tipo de archivo.

Ejemplo: ext:pdf Busca archivos de extensión PDF.

5. intext:

Esto buscará el contenido de la página. Esto funciona de alguna manera como una simple búsqueda en Google

6. site:

Esto limita la búsqueda solo a un sitio específico.

Ejemplo: site: abc@d.com limitará la búsqueda a solo abc@d.com.

site: abc@d.com

7. Cache:

Esto le mostrará la versión en caché de cualquier sitio web.

Ejemplo: cache: aa.com

The screenshot shows a Google search results page with the query "cache: aa.com" in the search bar. Below the search bar are several circular buttons for "Images", "Videos", "Shopping", "News", "Books", "Maps", "Flights", and "Finance". The search results indicate "About 7,47,00,000 results (0.29 seconds)". The first result is for American Airlines, titled "Website, mobile & app FAQs – Customer service", with a link to <https://www.aa.com>. The second result is for generoymetodologias.org, titled "Index of /media/cache/aa/", with a link to <https://generoymetodologias.org/media/cache/aa/>. The third result is for Mozilla Support, titled "Cannot log in to American Airlines website AA.Com", with a link to <https://support.mozilla.org/questions/1045>. The fourth result is for Cache Valley Intergroup, titled "Cache Valley Intergroup | I am responsible, when anyone ...", with a link to <https://cachevalleyaa.org>.

8. *

Esto funciona como un comodín.

Ejemplo: Cómo * sites, te mostrará todos los resultados como "*how to...*"
design/create/hack, etc... "sites"

Ejemplos de Google Dorking

1. Encontrar versiones vulnerables del software

El dork de Google intitle:"index of" "Apache/2.4.7 (Ubuntu) Server" se utiliza para encontrar sitios web que ejecutan Apache versión 2.4.7 en Ubuntu y tienen habilitada la lista de "índice de". Esto puede ser útil para encontrar sitios web potencialmente vulnerables, ya que las versiones anteriores del software pueden tener vulnerabilidades conocidas. Sin embargo, es importante tener en cuenta que acceder o intentar acceder a dichos directorios sin autorización es ilegal y poco ético.

Búsqueda de documentos expuestos públicamente:

filetype:pdf site: abc.com

A screenshot of a Google search results page. The search query is "filetype:pdf site:abc.com". The results show four items from ABC Network and two from Go.com | The Walt Disney Company. The first result is a PDF titled "Full Episode Player Mediakit for Affiliate Advertisers" which discusses Ad Pod dimensions. The second result is a PDF titled "Optimizing FLA Files for SWF Output" about optimizing graphics. The third result is a PDF titled "Grey's Anatomy" countdown calendar for September 2015, listing various days like Hug a Nanny Day and Psych Out a Friend Day. The fourth result is another PDF from Go.com about the same calendar.

filetype:pdf site:abc.com

[Index of /php/backup](#)

Index of /php/backup ; Parent Directory, -.

helylegal.com.au
https://www.helylegal.com.au › Backup ...
[Index of /Backup - Hely Legal](#)

Index of /Backup ; Parent Directory, -.

El dork de Google intitle:"index of" inurl: backup se utiliza para encontrar sitios web que tienen un listado de "índice de" en directorios con "backup" en la URL. Esto a veces puede revelar archivos de copia de seguridad o directorios que pueden contener información confidencial.

4. Encontrar vulnerabilidades de inyección SQL:

inurl: index.php?id=

The screenshot shows a Google search results page with the query "inurl:index.php?id=". The results are filtered by "Inurl". The first result is for "World Vegetable Center" at <http://www.avrdc.org/index.php?id=1>. The second result is for "EUFORES" at <http://www.eufores.org/id=131>, which links to a "Login" page. The third result is for "Indian Institute of Technology, Patna" at <https://www.iitp.ac.in/id=807>, which links to a "The Institute" page. The fourth result is for "Indo French Chamber of Commerce and Industry" at <http://www.ifcii.org.in/index.php?id=19011>, which links to a page with no information available.

El inurl de Google dork: index.php?id= se usa comúnmente para buscar sitios web que tienen URL que contienen "index.php?id=". Este tipo de estructura de URL a menudo se asocia con páginas web dinámicas que usan parámetros de consulta para recuperar contenido específico de una base de datos. Puede ser indicativo de sitios web vulnerables a ataques de inyección SQL, ya que los atacantes pueden intentar manipular el parámetro "id" para injectar código SQL malicioso.

5. Encontrar sitios con directorios expuestos que puedan contener archivos confidenciales:

intitle:"Index of" inurl:admin

2024-02-02	"Started by upstream project" ext:txt	Files Containing Juicy Info	Nadir Bouacheli (RubX)

La Google Hacking Database (GHDB) es un proyecto que se inició para catalogar varias consultas de búsqueda, conocidas como Google dorks, que se pueden utilizar para descubrir información vulnerable o sensible en sitios web. Estos dorks se utilizan para refinar las búsquedas de Google y encontrar tipos específicos de información a los que no se puede acceder fácilmente a través de las búsquedas estándar.

El GHDB incluye dorks para encontrar cosas como servidores web expuestos, scripts vulnerables, directorios confidenciales y más. Es importante tener en cuenta que, si bien el GHDB puede ser un recurso útil para los profesionales de la seguridad y los probadores de penetración, el uso de estos idiotas para el acceso o la explotación no autorizados es ilegal y poco ético.

El GHDB ya no se mantiene activamente como un proyecto separado, pero el concepto de los dorks de Google y su uso en las pruebas de seguridad sigue siendo relevante.

Dorking WhatsApp y Telegram

Es posible enumerar a los grupos de WhatsApp con un poco [de Google Dorking](#). El dork aprovecha los Grupos que ha permitido "**Invitar a Grupo a través de la función Enlace**".

Un administrador de grupo puede entonces generar un vínculo público compartido con el grupo para que otros se unan. Esta característica permite que los grupos sean indexados por Google y muchos otros motores de búsqueda que hace que esté disponible a través de Internet. Esto fue considerado inicialmente como una configuración errónea en WhatsApp, ya "**noindex**" que la indexación podría haberse evitado mediante el uso de la etiqueta meta , pero Facebook no lo aceptó como un error de seguridad.

Google ha eliminado la indexación de los enlaces de WhatsApp después de que el tuit se hiciera viral sin embargo otros motores de búsqueda no lo hicieron.

Google Dork: sitio:chat.whatsapp.com

Antes de que Google eliminó la indexación

Google search results for "site:chat.whatsapp.com":

Your search - **site:chat.whatsapp.com** - did not match any documents.

Suggestions:

- Make sure that all words are spelled correctly.
- Try different keywords.
- Try more general keywords.

Tras la eliminación de la indexación

Sin embargo, estos todavía están presentes en otros motores de búsqueda como DuckDuck Go, Bing, Yahoo, etc. Para explotar esto podemos adjuntar el término de búsqueda ya sea en el prefijo o sufijo del idiota para enumerar los grupos que tienen nombre relacionado.
